- 31. Olivia, Tilda
- 34. Lampshade Bertie
- 36. New Linen series
- 40. Lampshade Classico
- 44. Beta, Zeta
- 48. Accessories (indoors)
- 52. Lisen Series
- 57. Lollo Series
- 60. Bright light string (new model)
- 63. Accessories (outdoor)

## Spring/Summer 2024

The idea was to develop a range with something that feels familiar and safe in a troubled world. Something that doesn't stand out too much but adds warmth and a bright spot in your home, indoors or outdoors.

Products that are sustainable over time, primarily choosing natural and certified materials. Preferably products that can be used in multiple ways. Perhaps one doesn't renew at the same pace as before, with simple ways for less money, we can help renew for example with lampshades. A new lampshade for your lamp base or a pendant shade can give a completely new feeling to the room. The small details that you can love for a long time.

We are incredibly proud of our few but new products. They are smart, commercial, and affordable.

*// Anna & Quang, Purchase*

# Traceability & Certifications

Our passion for design and functionality drives us to strive for the development and creation of sustainable, safe, and high-quality products. Therefore, we work with various certifications to ensure that our assortment maintains a high standard. Here are some of the certifications you can find on our products.”

### CE/ROHS

That a product is CE-marked means that a manufacturer or importer certifies that the product is safe and complies with the EU's essential health, environmental, and safety requirements. Without the mark, the item cannot be sold within the EU. RoHS aims to reduce the risks to human health and the environment by replacing and limiting hazardous substances in electrical and electronic equipment

### OEKO-TEX

OEKO-TEX® is the world's leading health and environmental label for textiles. If a textile article bears the STANDARD 100 label, it means that the article has been tested for harmful substances and is therefore safe for human health.

### FSC

FSC 100% on a product means that all forest-based material used in the product comes from FSC-certified forests that have undergone independent scrutiny to confirm responsible management.

### GRS

The goals of GRS are to define requirements to ensure accurate content claims and good working conditions, as well as to minimize harmful environmental and chemical impact

# Material & Responsibility

It is important for us to take responsibility for how we impact the society we live and operate in. We don't believe everyone can do everything, but we are convinced that everyone can contribute something. Therefore, we want to do what we can to care for humanity, the environment, preserve our planet, and create products that endure over time.

## ECO-MIX

*"Sustainability at its best."*

Our handmade Eco-mix products are crafted from a ceramic-like material made of recycled paper, water, chalk powder, and natural glue. The lamps are handcrafted by local artisans in India using techniques passed down through generations. Simply a much better option for both nature and your home.

## NATURAL MATERIALS

Natural materials have many advantages; the material often ages in a way that adds character and beauty, ensuring the lamp endures over time. Many natural materials come from the plant kingdom and are therefore considered environmentally friendly. They are biodegradable and renewable, reducing the overall environmental impact. So, by making conscious choices for your lighting, you can create a harmonious home environment that is not only beautiful but also sustainable.

## AWARE

*"It's not just circular, it's pretty too."*

Aware collection is a circular collection where we use fabrics which would otherwise be wasted and give them a new life. A collection which is produced in our home-town Borås, with extra care for the environment.

## HANDCRAFTING

Behind many of our products, whether made of natural materials or metal, lies an important history of craftsmanship and handwork. Handcrafting is an art form that demands skill, precision, and dedication from artisans and creators. Every cut, every shape, and every joint represents a carefully considered process and creativity, where craftsmen invest time and expertise to create something unique. Feel free to ask us if you want to know more.

GENUINE RATTAN!

Lace and Zyla are hand-woven in delicate and thin genuine rattan, twisted to diffuse and provide a beautifully warm light in the room. The material may vary slightly in color but has a beautiful patina. Rattan is an environmentally friendly and sustainable material that endures year after year.

LACE PENDANT LAMP, TWISTED RATTAN

Art.nr		RRP	RRP	Q

**FOR THE BATHROOM!**

Just like in other rooms of your home, lighting plays a significant and crucial role in the bathroom. The wall lamps Beta and Zeta illuminate and assist you in your routines, whether you're getting ready for a night out, having a spa evening, showering, cleaning, or need to use the bathroom in the middle of the night.

**EDGE LED!**

Experience the perfect blend of vintage charm and modern efficiency with this fantastic light source. Edge LED is currently available in 5 different glass shapes, 2 colors, all with an E27 socket. With LED, you not only choose better lighting but also a more sustainable and cost-effective lighting solution for your home.

## Beautiful summer evenings!!

What would the patio be without ambiance lighting that invites late summer evenings? Because there's nothing that feels more like summer as much as delightful dinners with good company turning into late nights. Conversations flow and laughter echoes through the air. That's when cozy lighting in the form of light strings, table lamps, and ceiling lights becomes a real mood-setter, adding that extra touch to the atmosphere when darkness falls.

In our new collection, you'll find classic shapes, earthy tones, beautiful textures, and weather-resistant materials.

// E Minor, Art Director

**POLYRATTAN**

Our ceiling shades in polyrattan are made of recycled plastic. The major advantage of this type of material is that it is very durable, resilient, and easy to maintain, just wipe it with warm water. So, the Lollo pendant shade in pollyrattan is not only decorative but also weather-resistant and functional.
