SVANEFORS
QUALITY OF SWEDEN

Textiles & patterns that differ, but always one thing that unites, Swedish design. Interior details that match & everything has the special feeling that is Svanevors signature, natural and simple.

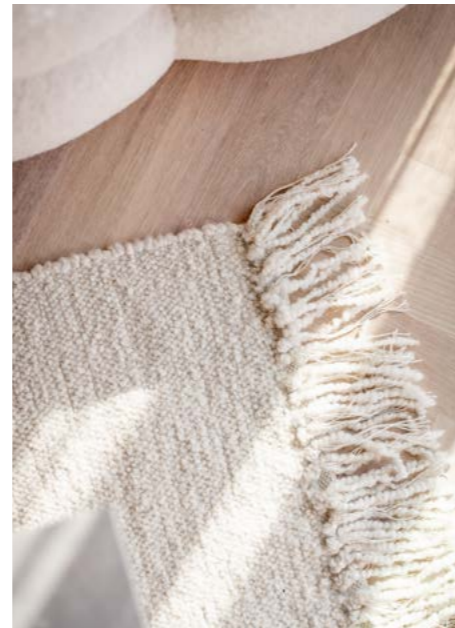

A softer world, since 1956.

HANGING CURTAINS

Most of our curtains are equipped with multibands, which means that you can put up the curtain in several different ways. Here are four different ways to hang the curtains:

Wrinkle band hook

If you have a curtain rail, hooks are the best way to hang the curtains, as they slide smoothly into the rail and make it easy to adjust.

Five tips when choosing curtains:

- Hang the curtains high. It make the room feels bigger.
- Curtain rail makes it easy to pull the curtain back and forth and is a convenient choice for making the curtains hang right from the ceiling.
- Hang wide. The curtain rod or rail should be longer than the width of the window, then you can place the curtains on the side of the window and maximize the light entry.
- Choice of material and color affects the impression to the greatest extent, tone on tone, patterned, darkening or clear?
- Choose the right length, choose a pair that ends just above the floor or – for a more casual feel – a longer pair that lays on the floor.

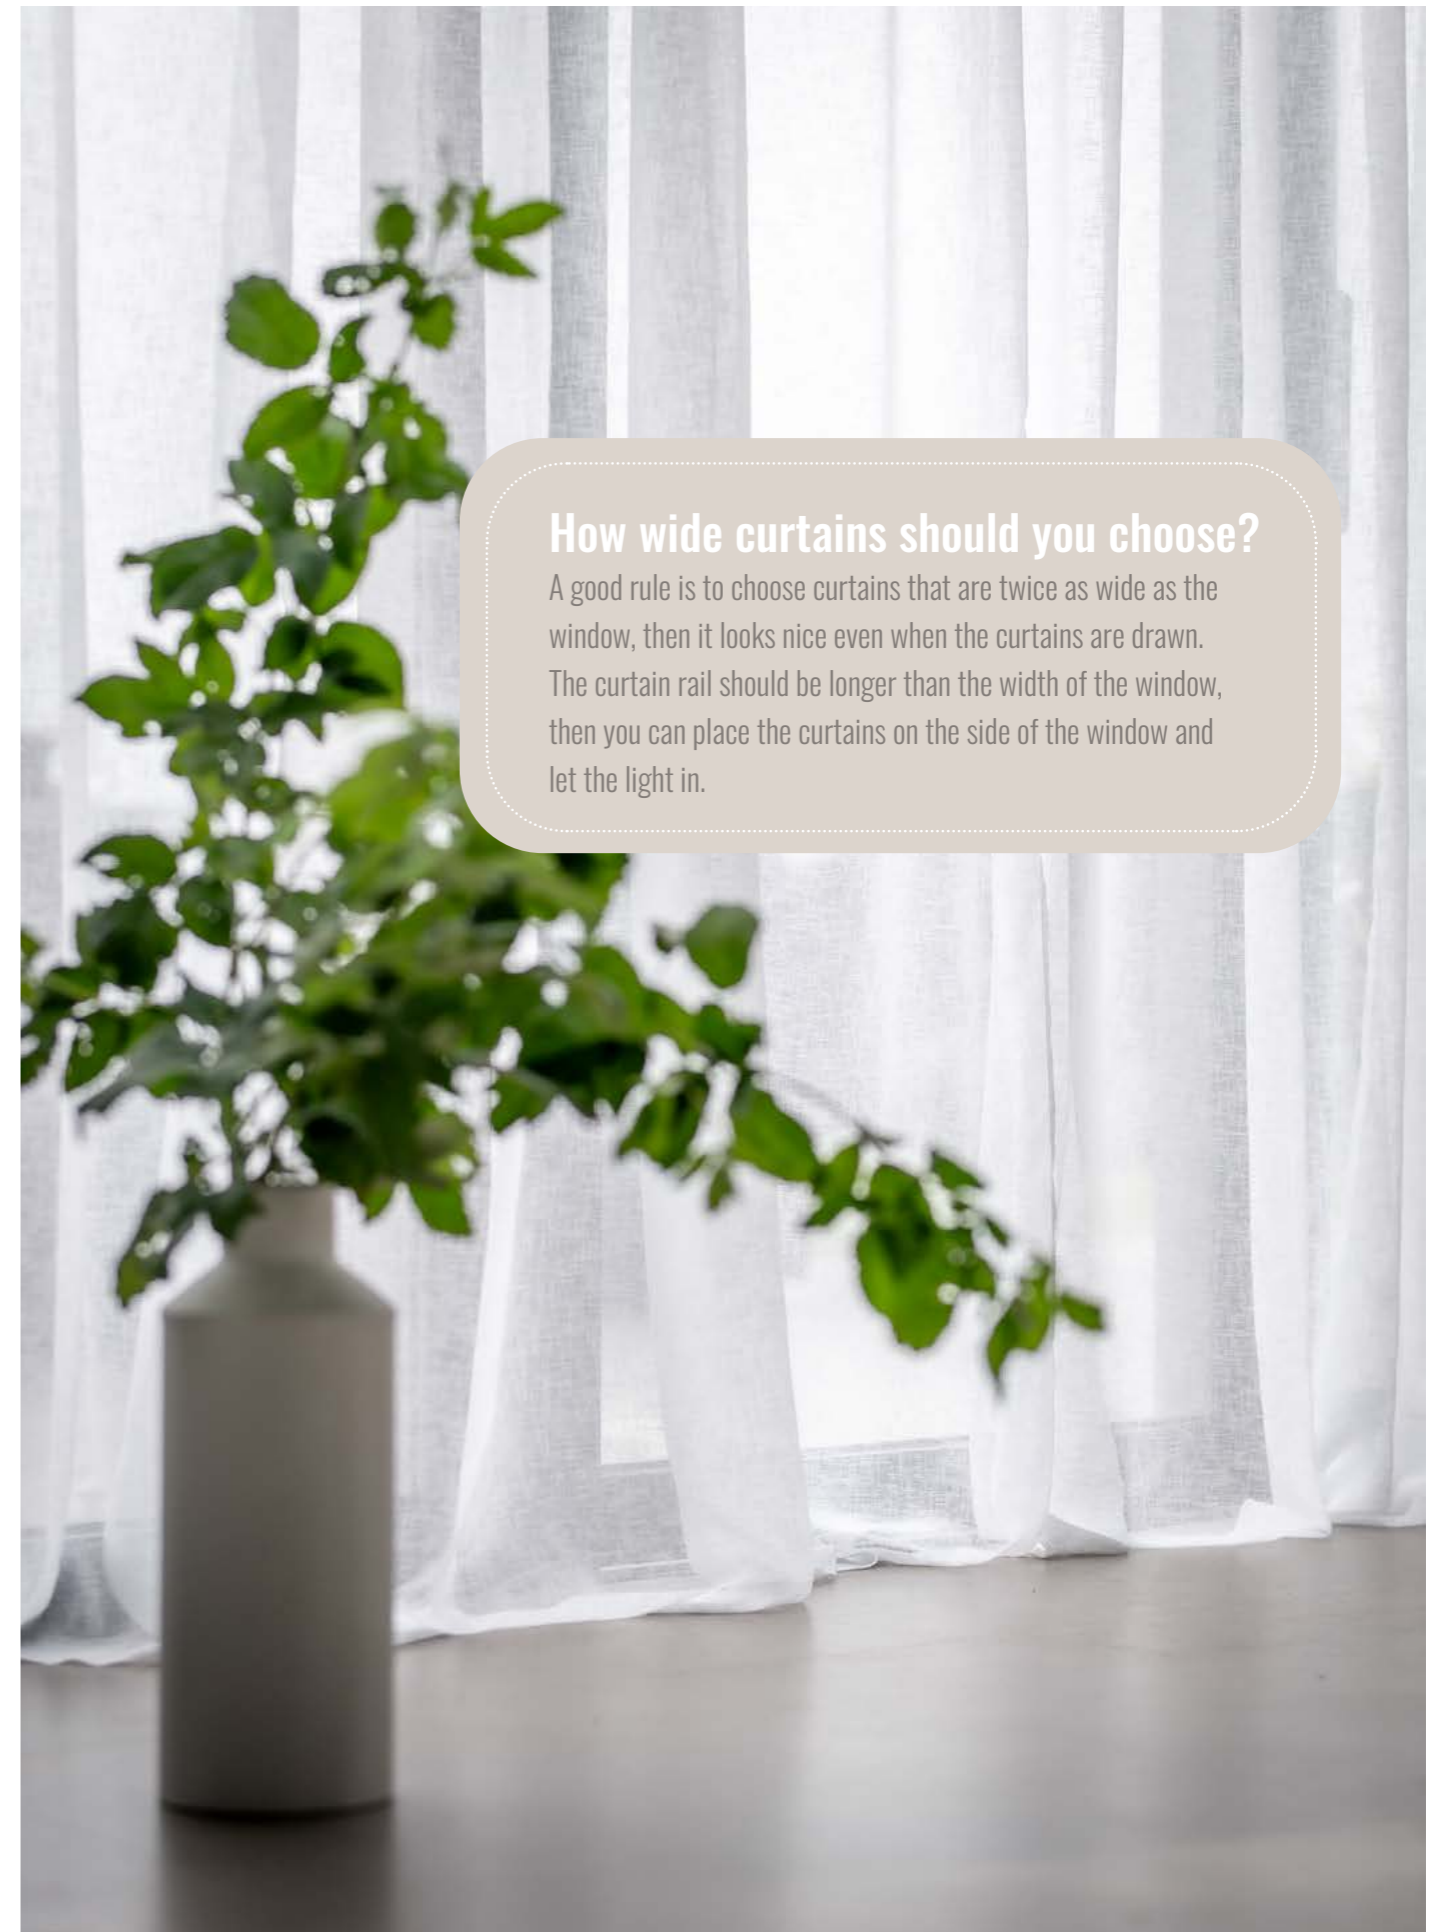

Easily shorten the curtain by ironing on quick hemming tape.

How wide curtains should you choose?

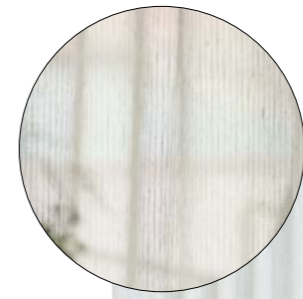

A good rule is to choose curtains that are twice as wide as the window, then it looks nice even when the curtains are drawn. The curtain rail should be longer than the width of the window, then you can place the curtains on the side of the window and let the light in.
